1. Purpose of the S-NRUF

Based on the October 2021 J-NRUF results published on 17 November 2021, the Canadian Numbering Administrator (CNA) concluded that a Jeopardy Condition did not exist in NPAs 204/431, 343/613, and 819/873 which cover the respective geographic areas of Manitoba, Eastern Ontario and North and Western Quebec.

CRTC staff concurred with the CNA’s plan to freeze all CO Code assignments in NPAs 204/431, 343/613 and 819/873 based on the October 2021 J-NRUF submissions. The freeze was to ensure NPAs 204/431, 343/613 and 819/873 do not slip back into a Jeopardy Condition prior to the introduction of the relief NPA. The CNA will also conduct quarterly S-NRUFs at the NPA-level of detail for the above NPAs until relief is in place.

In accordance with CRTC staff directions, the CNA conducted S-NRUFs in January 2022.

The CNA has prepared this S-NRUF report in accordance with the C-NRUF Guideline.

2. High Level Summary

The CNA has rationalized the January 2022 NPA 204/431, 343/613 and 819/873 S-NRUF inputs from various Telecommunications Service Providers (TSPs) and the variance from previous inputs appears reasonable.

4. S-NRUF Assumptions

The assumptions used for the January 2022 NPA 204/431, 343/613, and 819/873 S-NRUF are the assumptions directed by CRTC staff on 18 and 19 November 2021 and 2 December 2021 to the CNA.

5. Summary of Challenges Encountered During the S-NRUF Process

Most TSPs continue to rely on the CNA to remind them of the due date. The CNA started contacting companies on 24 January 2022. Despite this initiative, some S-NRUF submissions were late and incorrect.

6. Conclusion

The NPA 204/431 January 2022 PED (with Assignment Restrictions) of November 2023 is realistic.

The NPA 343/613 January 2022 PED (with Assignment Restrictions) of June 2023 is realistic.

The NPA 819/873 January 2022 PED (with Assignment Restrictions) of August 2023 is realistic.
