Table 4 – NorthwesTel exchanges in NPA 250 identified in Plans 3d, 3f, 3h, 3j and 3l

The following table lists NorthwesTel exchanges that are excluded from:

- the overlays in Plan 3d and 3h
- the initial overlay and subsequent boundary realignments in Plan 3f, 3j
- the initial overlay but not the subsequent boundary realignments in Plan 3l

Blueberry	Fort Ware	Muncho Lake
Bob Quinn Lake	Good Hope Lake	Prophet River
Cassiar	Iskut	Telegraph
Dease Lake	Lower Post	Toad River
Fort Nelson	Mould Creek	Wonowon

Table 5 – Certain exchanges in northern BC identified in Plans 2b, 3e, 3g, 3i, 3k and 3m

The following table lists certain northern BC exchanges that are excluded from:

- the boundary realignment in Plan 2b
- the Concentrated overlays in Plan 3e and 3i
- the initial Concentrated overlay and subsequent boundary realignments in Plan 3g and 3k
- the initial Concentrated overlay but not the subsequent boundary realignments in Plan 3m

These certain northern BC exchanges are 42 exchanges where the following criteria are met:

- the exchange currently has no more than one CO Code assigned in it,
- the NRUF forecast shows no future additional CO Codes for growth or initial codes for new Code Holders in the exchange, and
- there is no local calling from the exchange to exchanges that have multiple Code Holders and/or multiple CO Codes

The rationale for the above criteria is that exchanges meeting these criteria should not need any CO Codes in the new NPA, and will not have local calling to any exchange with multiple CO Codes, so therefore no changes to the local dial plan would be needed in those exchanges after NPA 250 relief. Exchanges with multiple CO Codes are not included because these exchanges are large enough to have experienced previous CO Code growth, and future CO growth is therefore more likely in these exchanges than in exchanges with a single CO Code. When CO Code growth is the result of the entry of additional telecommunications service providers into the exchange, the CO Code growth may occur without any increase in the population or in the demand for numbers.

Hudson's Hope	Wonowon
Montney	

Table 7 – Special CO Code Assignment Practices

This Table is applicable to Relief Option 2c with the introduction of mandatory 10-digit local dialing deferred to Phase 2.

The following Special CO Code Assignment Practices shall be applied when Central Office (CO) Codes in NPA 778 are assigned to Exchange Areas in NPA 250 after NPA 778 CO Codes become available for assignment in the NPA 250 area and before the introduction of mandatory 10-digit dialling in the NPA 250 area in accordance with Phase 2.

The purpose of these Special CO Code Assignment Practices is to allow for NPA 778 CO Codes to be assigned in Exchange Areas in NPA 250 while 7-digit dialling is temporarily retained in the NPA 250 area without the dialling conflicts that would be created if the same CO Codes were to exist in the same Local Calling Area in both NPAs 250 and 778. Since no local calling exists between the Island and Mainland portions of the NPA 250 area, the objective of no conflict can be achieved if the available-for-assignment CO Codes in NPA 778 are divided into two categories, those that can be assigned in the Island portion of NPA 250 or in the NPA 604 area, and those that can be assigned in the Mainland portion of NPA 250 or in the NPA 604 area. This simple division will provide an ample quantity of CO Codes to meet demands in the NPA 250 area until Phase 2 relief is completed, while avoiding the need for analysis of multiple Local Calling Areas as was necessary for the Special CO Code Assignment Practices in NPA 613/819.

- 1) When a new NPA 778 CO Code must be assigned in the Mainland portion of NPA 250, the Canadian Numbering Administrator (CNA) shall assign an available NPA 778 CO Code that does not correspond to any NPA 250 CO Code assigned in the Mainland portion of NPA 250.
- 2) When a new NPA 778 CO Code must be assigned in the Island portion of NPA 250, the CNA shall assign an available NPA 778 CO Code that does not correspond to any NPA 250 CO Code assigned in the Island portion of NPA 250.
- 3) When a Telecommunications Service Provider (TSP) requests a CO Code Assignment in the NPA 250 area and no NPA 250 CO Codes are available, the TSP should request and must accept a CO Code assignment that meets the criteria described in 1) and 2).
- 4) TSPs are encouraged to request CO Codes from NPA 778 when the purpose of the CO Code assignment is to obtain an LRN to facilitate Number Portability in BC.

These Special CO Code Assignment Practices shall be discontinued when implementation of mandatory 10-digit local dialling has been completed.

Note:

- (1) The Mainland portion of NPA 250 includes the Queen Charlotte Islands, and central coast islands, and communities other than Ocean Falls.
- (2) The Island portion includes all southern Gulf Islands, northern Gulf Islands (except Texada), and Ocean Falls.
